

LeMoyne-Owen College

Interim Faculty Member in Biology

Job Code: BIOL2019

(Place the job code in the subject line of your e-mail.)

LeMoyne-Owen College, an HBCU located in Memphis, Tennessee, is a four year liberal arts college seeking applications for the following position.

This is a nine-month faculty position for the academic year of 2019-2020. The basic qualification for the position is a Ph.D. degree in Biology with expertise in the area of cell biology and/or genetics. The faculty member will teach undergraduate courses (lecture and labs) in cell biology and genetics for biology majors and biological sciences for non-science majors. If the candidate has an active research project that is appropriate for undergraduate students, he/she may have the opportunity to lead undergraduate students in research. In addition, he/she will also participate in general activities of the college including divisional activities and college related activities.

Starting Date: The incumbent can begin **August 15, 2019**.

Application Deadline: Applications will be reviewed as received. Please submit your application with CV, transcripts, statement of philosophy of teaching, evidence of research and grantsmanship, and a list of persons who will send letters of reference directly to the e-mail address given below.
